COMPLAIN

Leper Settlement Complaints Again.

REYNOLDS BACKED BY THE BOARD

Not Responsible to the Legislature for His Acts.

Soreheads of the Leper Settlement were very much in evidence yesterday at the meeting of the Board of Health in the form of written kicks, petitions, requests and the minor other little epistles which the lepers at Kalaupapa and Kalawao seem to spend most of their spare time in perpetrating. There were the usual complaints of Superintendent of the Settlement Reynolds, "kicks" about the alleged insufficiency of the food supplies and the usual charges of discrimination. There was a fine assortment of every class of mail matter which could be considered under the single head of "childish

The result of the entire discussion over the assortment of epistles was that the Board fully sustained St intendent Reynolds and said that from its investigations they had confidence in him. As to the legislature and its investigating committee, the Board claimed it did not have to look to that body for instructions, and neither did Superintendent Reynolds need be responsible to the Legislature for his act: as an employee of the Board of Health. He was responsible alone to the Board

and to no other body or person President Raymond stated the posttion of the Board with reference to the acts of its employees clearly and distinctly. If the Legislature chose to appoint a committee to make an investigation of the condition of affairs at the Leper Settlement, that right was no doubt inherent. To make its investigations fully the Superintendent should have been subjected to a personal examination by that committee which it had thus far failed to do, although given every opportunity.

Mr. Reynolds stated to the Board that he was and had always been ready at any moment to go before a Legislative committee in connection with the recent inquiries instituted by that body of solons but beyond answering a few general questions at one of the Board meetings he had heard nothing further from the committee. He courted an inquiry and was willing to have the committee blaze away at him with as many questions as it desired to put.

The Superintendent said he had not pressed the Board to accept his resignation at once on account of his desire the Board to accept his resignation im-

"The Board of Health will stand bewith your work, and I would advise you Captain Talbot and Captain Connell to stand pat." So Superintendent Rev-

There were two petitions presented to be discharged as incompetent. The other signed by a larger number of lepers, stated that they did not know of anything against Mr. Reynolds, either as a man or as the Superintendent, accept his resignation but to continue him in his office, as he was entirely satisfactory to them. If a majority rules in any case, the majority of the lepers at the Settlement are in favor of the retention of Reynolds as the Superintendent. Both petitions were laid on the table.

Following is the petition calling for

Reynolds' resignation: The undersigned lepers living at Kalaupapa and Kalawao, Molokai, do humbly ask that C. B. Reynolds be removed from the position of superintendent and W. J. Feary from the position of assistant superintendent of the Leper Set-

tlement, for the following reasons: 1. Requests of lepers to the superintendent or his assistant for repairs to houses, water pipes, etc., are not com-

plied with. 2. Bulky parcels belonging to lepers are not sent to their houses from the ware-

3. Public works of the Settlement from Waikolu to Kalaupapa are not being looked after by the superintendent or his assistant, from day to day.

4. The assistant superintendent is incapable of properly supervising any work as he has sore feet and sore eyes.
